

## NEWHALL

### What have we been learning?

- This week in maths we have been revising the methods we have learnt for addition and subtraction.
- In art we have started our new weaving project. We will be creating four woven pieces, one to represent each of the seasons. We started looking at colours that represent each season.
- In science we have begun looking at animals. This week we went on a animal safari and named the animals we found.
- We have started our new topic 'Tutti Fruity Smoothies'. We have started by looking at a healthy, balanced diet which ties in beautifully with our new PSHE topic, being healthy.

### Homework:

- Maths seed—Lesson 88
- Look, cover, write and check spelling; all, ball, small, walk, talk
- Daily reading practise
- Phonics

### Just a few reminders...

- We will be celebrating World Book Day on Friday 6th March. Come dressed as something wild! We will be doing activities based around the book 'Where the Wild Things Are'.
- We are celebrating Sport Relief on Friday 13th March, come to school in sports wear (or you can get changed into your PE kit at school) and bring a donation for Sport Relief.
