

Our Week In Year One

Friday 13th March 2020

NEWHALL

What have we been learning?

- We had a fantastic day supporting Sport Relief. The children all had the chance to use our fencing and archery equipment. It was very exciting! Thank you so much for your kind donations towards this wonderful charity.
- This week in maths we have been looking at more and less than numbers up to 40. We have been using concrete materials and pictures to support our learning.
- We have been doing a number of STEM activities this week (science, technology, engineering and maths) including building boats to transport objects and creating a parachute to help an egg land safely!
- This week the children designed, made and evaluated fruit kebabs. We had lots of fun cutting and peeling in the teaching kitchen and even more fun eating what we made!

Homework:

- Maths seed—Lesson 90—skip counting.
- Look, cover, write and check spelling; was, saw, want, watch, watches
- Daily reading practise
- Phonics

Just a few reminders...

- **HELP!** We are in need of different materials to use in art. If you have any thing that we could use to cut up such as; fabric, t-shirts, pillow cases, hessian, bubble wrap or wrapping paper etc, we would be very grateful. Thank you!
