

Our Week In Year One

Friday 27th November 2020

NEWHALL

What have we been learning?

- This week the children made a beautiful painted picture in science to show the difference between day and night.
- In maths the children began to combine their knowledge on addition and subtraction and write matching addition and subtraction number sentences for a number bond picture.
- In RE the children have been looking at Guru Nanak and illustrated some key stories.
- In geography the children had the chance to meet a significant person 'Robert FitzRoy' who invented the weather forecast through a drama activity of hot seating in class. They loved this!

Home Learning

- Daily reading and phonics.
- Mathseed lesson 58– Subtraction on a number line.
- Weekly 'Look, Cover, Write and Check'.

Just a few reminders...

- As you can imagine some things are difficult at the moment and so we regret to tell you that class Christmas shows will be postponed until the next academic year. Instead the children will have lots of fun in the lead up to Christmas as we have a 'Polar Express' theme for the last few weeks. Ending with a big finish on Thursday **17th December** of watching the film and children are welcome to bring their **slippers to school** and enjoy hot chocolate. The children will still have a class party but we will not be accepting food donations from home. Please let us know if dietary requirements have changed.
- Each class will have their own Christmas post box in the classroom for children to post their cards, which will be quarantined until we distribute them 3 days later. The deadline for Christmas cards will be Monday 14th December.
- Have a lovely weekend!
